OPEN STREAM

openfiber.it/en

Choose **Open Fiber** and its **Open Stream** service to offer your retail and business customers **full fiber ultra-broadband** services, without investing in developing an access network.

SERVICE SPECIFICATIONS

- Nationwide coverage.
- GPON FTTH technology with Point-to-Multipoint architecture.
- Carrier-grade Service Level Agreement.
- 10G and 100G L2 NNIs available in all Open Fiber Points of Presence and in Internet eXchange Points.
- High reliability and efficiency.
- Reduced time to market and service setup.
- Extremely flexible pricing.
- VLAN tagging 802.1Q.

SERVICE DESCRIPTION

Designed to address the needs of each Operator, the Open Stream service offers tailor-made solutions for the management and delivery of traffic (Monocos/Multicos with VULA, City and Any-to-Any delivery).
The entire physical infrastructure, the activation and the management service are provided by Open Fiber.
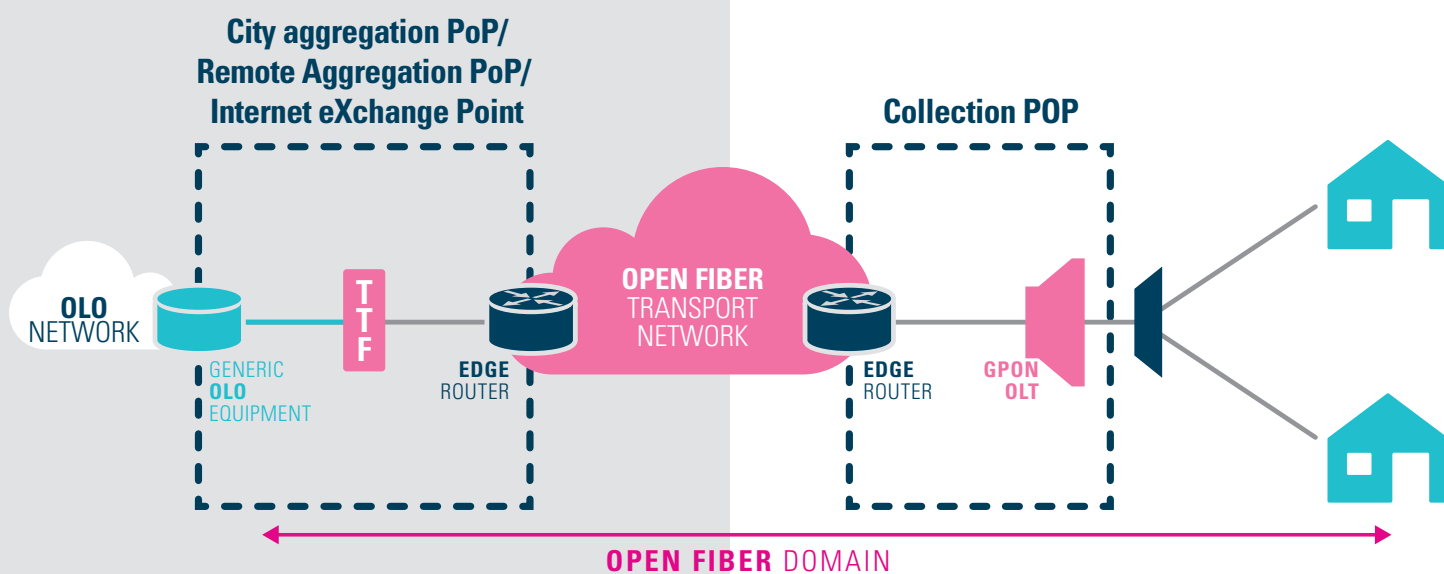

TRAFFIC DELIVERY

The traffic is delivered to:
- Points of Presence where the customers' site is connected (VULA).
- Points of Presence in cities (City).
- Nationwide Remote Points of Presence or to Internet Exchange Points (Any-to-Any).
