

WAVE-LENGTH

openfiber.it/en

The **Open Fiber's Wavelength** service provides secure high speed and guaranteed bandwidth connectivity, allowing our customers to easily scale network capacity.

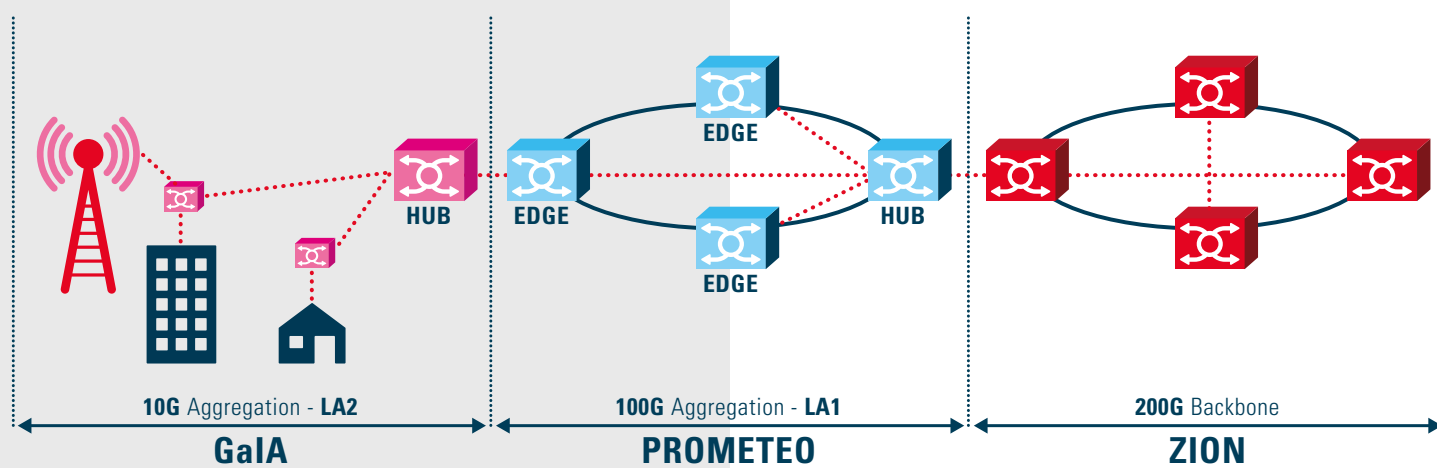

SERVICE SPECIFICATIONS

- Nationwide coverage.
- Ensure a high level of privacy and security.
- Predictable latency and high capacity for bandwidth-intensive applications.
- Carrier Grade Service Level Agreement.
- 10G and 100G (and more) service options.
- Latest generation optical platform.
- Several protect and route diversity options to meet the most stringent customer.

SERVICE DESCRIPTION

Designed to optimally satisfy the capacity, diversity and latency needs of the most demanding Industries, the Wavelength service allows its customers to expand the network according to the bandwidth requirements. The service is available at speeds of 10G or 100G (and more) and it is provided by the latest generation DWDM infrastructure with nationwide delivery. You can choose from a range of purchase options, including leasing and IRU agreements, to allow maximum flexibility in planning your business.
