

Open internet service

Open Internet service offered by Open Fiber, is designed for anyone who wants to become a Fixed Virtual Network Operator (FVNO) and aims to offer an end-to-end fiber internet access service, without investing in network infrastructure.

A simple solution that allows you to be part of the TLC market with the highest performance.

SERVICE SPECIFICATIONS

- » This service is available for A&B, C&D e IIG clusters.
- » PON FTTH access technology with speed from 2,5 Gbps to 10 Gbps.

- » No investment required in network infrastructure development.
- » Internet access and interconnection to content providers in the main Italian Internet eXchange Point.
- » Reduced Time-to-Market.
- » Dedicated technical assistance.

SERVICE DESCRIPTION

Designed to offer a “all inclusive” service, Open Internet allows you to provide an Internet access service via the Open Fiber network infrastructure. Open Fiber provides all the technical support required to deliver Internet access (including end user authentication/ authorization/ accounting, IP address assignment, fault and malfunction management), as well as residential gateway supply and management.
